

# WELCOME TO TATA SEQUOIA

- ✓ We benefit from investing in india's large companies.

# A FEW WORDS ABOUT US !

**MR. RAJAN ANANDAN**

**MD, TATA SEQUOIA**

Mr. Rajan Anandan is the MD of Tata sequoia and Sequoia India. Apart from being an executive and a businessman, Rajan Anandan is an active angel investor. Over the last 13 years, he has made around 80 personal investments in multiple startups. And would like to thank Mr. Ratan Tata ji who has given us great opportunities and we will fulfill our responsibility with full force. We are an investor, built, owned, operated and managed for many years. And we are ISO 9001:2015 and ISO 27001:2013 certified for providing Network Marketing Services

Most innovative INVESTMENT company in india.

# ABOUT US !

TATA SEQUOIA is a leading data centre micro sale and leaseback company with operations in across India.

India's largest network of data centre

The company's mission is to create entrepreneur

**LET'S START**

# Transform your business with TATA cloud

TATA SEQUOIA is a leading data centre micro sale and leaseback company with operations in across India. Headquartered in Himachal Pradesh, India, The company's product offerings micro sale and leaseback which offer to data assets to our partner and he is buy asset for rent out which generate rental income. The company plans on expanding its business across other sectors such as financial services, education, and more.

The company's mission is to create entrepreneur all over India by providing them with market opportunities and training them with skills that they can use to start their own businesses.

# What is Data Center ?

# Transform your business with TATA cloud

Imagine we use mobile it has some memory like 16GB 32GB 128GB. Our mobile's data is saved into memory Similarly, the data of the bank is also saved somewhere, it is stored in the data centre.

Many times you have seen saying by the bank employee that the bank's server is down today and we think that it will be the problem of internet, but it is not so, it is a problem from the bank's data centre which is not working properly, it means there is a problem with the infrastructure of the bank's data centre.

To solve this problem, TATA SEQUOIA has taken the responsibility that now company will work on this problem.

# **India need 1 lac data centre, but unfortunately we have only 630 data centre**

India need 1 lac data centre, but unfortunately we have only 630 data centre. data centre cost very expensive, Its cost comes in crores 1 server cost is 43 Lac. Our new data centre work progress in Himachal Pradesh, Chandigarh, Delhi, Bangalore.

# Passed bill by Lok Sabha in 2015-2016

We all have MasterCard and the company is from America, which means America has Indian customer's data, which is not secure, fraud can also happen. For security new rule passed bill by Lok Sabha in 2015-2016 Lok Sabha agreement with MasterCard that in future all Indians consumer's data store in India, it didn't happen.

Indian population is very high and data centre infrastructure expense too high and take long time so MasterCard's market going down. India company like Visa, RuPay has increased a lot because now all Indian consumer's data is stored in India only.

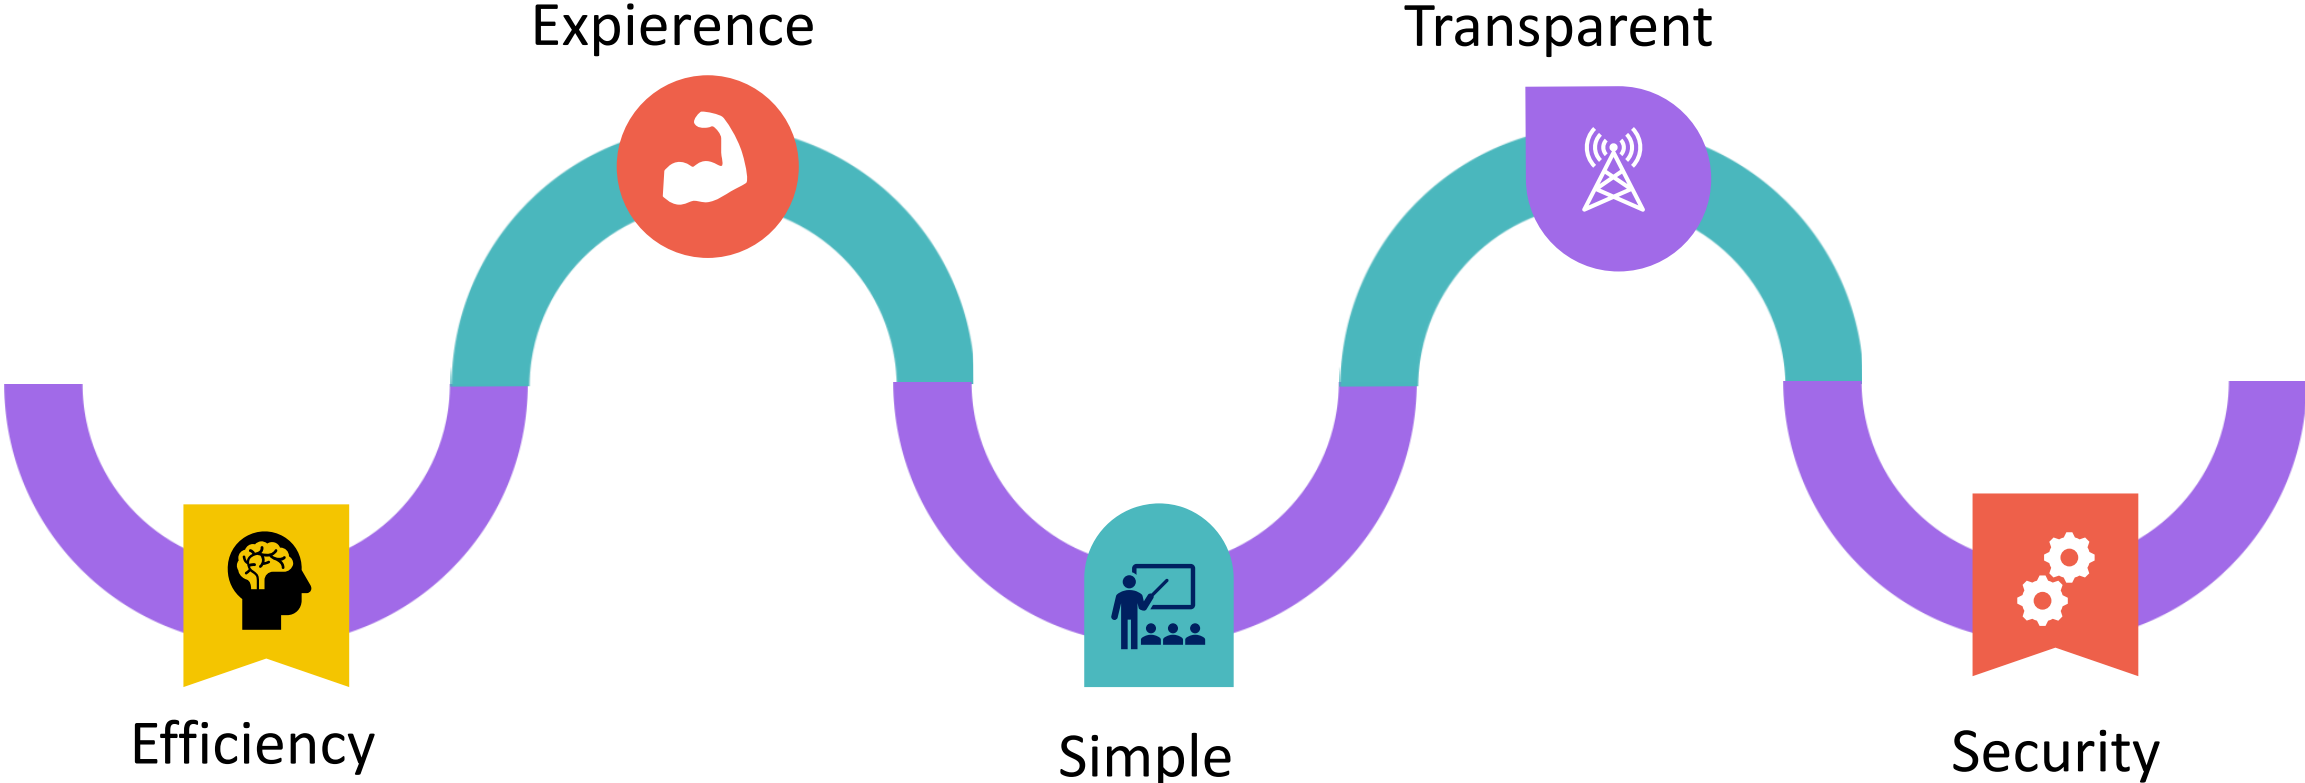

# We need Data Highways

Just like there are Roadways, Railways & Airways to which the country is connected. In the same way, we need Data Highways, over which our data is traveling easily.

## Supply gap between resources

If we see, what we talk about buffering, what we talk about video quality, where we talk about server timeout, then these things seem natural to us, then it would be the same. But this happens because of the supply gap between demand and resources.

# OUR SERVICES
